Price, for a tool with all these options they offer a great price.	Access for clients, so you can manage and view multiple clients.
Good mobile app, easy to use many options.	Great for entry level, it's so easy.
While it's great for small business, zzp, it's not that great for bigger companies.	Many say this, and it's still not there. No payroll module...

Ease of use	Very easy rollout to the entire team	Streamlined expense reporting
Integrating invoicing with the CRM	Mobile app is a little clunky, especially when processing receipts.	CRM data flow can be slow sometimes.
Integration with other finance apps, not the greatest.
